The book examines the role of the Crimean khan, members of his council and other officials in the Crimean political and judicial systems as well as the practice of the Crimean sharia court during the reign of Murad Giray (1678-1683). Armed with only a telescope, a watch, and a notebook he retrieved from a dead soldier, William Howard Russell spent twenty-two months reporting from the trenches for the Times of London during the Crimean War. A novice in a new field of journalism -- war reporting -- when he first set off for Crimea in 1854, the young Irishman returned home a veteran of three bloody battles, having survived the siege of Sebastopol and watched a colleague die of cholera. Russell's fine eye for detail electrified readers, and his remarkably colorful and hugely significant accounts of battles provided those at home -- for the first time ever -- with a realistic picture of the brutality of war. The Crimean War, originally published in 1856 under the title The Complete History of the Russian War, presents a selection of Russell's dispatches -- as well as those of other embedded reporters -- providing a ground-eye view of the conflict as depicted in British newspapers. Fought on the southern tip of the Crimea from 1853 to 1856, the Crimean War raged on far longer than either side expected -- largely because
of mismanagement and disease: more soldiers died from cholera, typhus, typhoid, dysentery, and scurvy than battle wounds. Russell's biting criticisms of incompetent military authorities and an antiquated military system contributed to the collapse of the contemporary ruling party in Britain. In his reports, Russell wrote extensively about inept medical care for the wounded, which he termed "human barbarity." Thanks to compelling accounts by Russell and others, authorities allowed Florence Nightingale to enter the war zone and nurse troops back to health. The Crimean War contains reports from military men who acted as part-time reporters, articles by professional journalists, and letters from others at the front that newspapers back home later published. Rapidly pulled together by American publisher John G. Wells, the volume presents a fascinating contemporary analysis of the war by those on the ground. This reissue offers a new introduction by Angela Michelli Fleming and John Maxwell Hamilton that places these reports in context and highlights the critical role they played during a pivotal point in European history. The first first-hand accounts of the realities of war, these dispatches set the tone for future independent war reporting. The Crimean War was fought far from its namesake peninsula in Ukraine. Until now, accounts of Britain's and France's naval campaigns against Czarist Russia in the Baltic, White Sea, and Pacific have remained fragmented, minimized, or
thinly-referenced. This book considers each campaign from an imperial perspective extending from South America to Finland. Ultimately, this regionally-focused approach reveals that even the smallest Anglo-French naval campaigns in the remote White Sea had significant consequences in fields ranging from medical advances to international maritime law. Considering the perspectives of neutral powers including China, Japan, and Sweden-Norway, allows Rath to examine the Crimean conflict's impact on major historical events ranging from the 'opening' of Tokugawa Japan to Russia's annexation of large swaths of Chinese territory. Complete with customized maps and an extensive reference section, this will become essential reading for a varied audience.

The Origins of the Crimean War

This report assesses the annexation of Crimea by Russia (February–March 2014) and the early phases of political mobilization and combat operations in Eastern Ukraine (late February–late May 2014). It examines Russia’s approach, draws inferences from Moscow’s intentions, and evaluates the likelihood of such methods being used again elsewhere.

The Crimean War (1853-56) between Russia, Turkey, Britain, France and the Kingdom of Sardinia was a diplomatically preventable conflict for influence over an unstable Near and Middle East. It could have broken out in any decade
between Napoleon and Wilhelm II; equally, it need never have occurred. In this masterly study, based on massive archival research, David Goldfrank argues that the European diplomatic roots of the war stretch far beyond the `Eastern Question' itself, and shows how the domestic concerns of the participants contributed to the outbreak of hostilities.

Russia's long-standing claims to Crimea date back to the eighteenth-century reign of Catherine II. Historian Kelly O'Neill has written the first archive-based, multi-dimensional study of the initial "quiet conquest" of a region that has once again moved to the forefront of international affairs. O'Neill traces the impact of Russian rule on the diverse population of the former khanate, which included Muslim, Christian, and Jewish residents. She discusses the arduous process of establishing the empire's social, administrative, and cultural institutions in a region that had been governed according to a dramatically different logic for centuries. With careful attention to how officials and subjects thought about the spaces they inhabited, O'Neill's work reveals the lasting influence of Crimea and its people on the Russian imperial system, and sheds new light on the precarious contemporary relationship between Russia and the famous Black Sea peninsula.

The Crimean War combines an extraordinary oral and visual account of the Crimean War -- including many photographs and accounts never previously published. The history is told from eyewitness accounts from people on all sides of the conflict (British, French, Russian and Turkish) -- in the forms of letters and diaries of soldiers, sailors, doctors, artists, nurses and reporters. And as the Crimean War was the first war to be photographed and to which war
artists were assigned, the book is heavily illustrated with striking images of war. The combination of art and personal accounts makes for an incredibly fascinating and original perspective on the events. This history of the Crimea is essential reading for all those who have been perplexed by what lies behind Russia's recent annexation of the Black Sea peninsula. The Russian annexation of the Crimea in March 2014 focused the world's attention on the Peninsula in ways not seen since the Crimean War. Thousands of Crimean Tatars clashed with pro-Russian militia members in Simferopol, while Moscow has in turn stoked fears of jihadi terrorism among the overwhelmingly Muslim Tatars as retrospective justification for its invasion. The key thread in this book is the Crimean Tatars' changing relationship with their Vatan (homeland) and how this interaction with their natal territory changed under the Ottoman Sultans, Russian Tsars, Soviet Commissars, post-Soviet Ukrainian authorities and now Putin's Russia. Taking as its starting point the 1783 Russian conquest of the independent Tatar state known as the Crimean Khanate, Williams explains how the peninsula's native population, with ethnic roots among the Goths, Kipchak Turks, and Mongols, was scattered across the Ottoman Empire. He also traces their later emigration and the radical transformation of this conservative tribal-religious group into a modern, politically mobilized, secular nation under Soviet rule. Stalin's genocidal deportation of the Crimean Tatars in 1944 to Uzbekistan and their almost messianic return to their cherished 'Green Isle' in the 1990s are examined in detail, while the author's archival investigations are bolstered by his field research among the Crimean Tatar exiles in Uzbekistan and in their samozakhvat (self-seized) squatter camps and settlements in the Crimea.
First published in the year 1857, the present book 'Wonderful Adventures of Mrs. Seacole in Many Lands' was written by Mary Seacole. As evident from the title, this is a fictional novel of women's adventures.

The Crimean War is full of resonance - not least, the Charge of the Light Brigade, the Siege of Sevastopol and Florence Nightingale at Scutari with her lamp. In this fascinating book, Clive Ponting separates the myths from the reality, and tells the true story of the heroism of the ordinary soldiers, often through eye-witness accounts of the men who fought and those who survived the terrible winter of 1854-55. To contemporaries, it was 'The Great War with Russia' - fought not only in the Black Sea and the Crimea but in the Baltic, the Arctic, the Pacific and the Caucasus. Ironically, Britain's allies were France, her traditional enemy, ably commanded (from home) by Napoleon III himself, and the Muslim Ottoman Empire, widely seen as an infidel corrupt power. It was the first of the 'modern' wars, using rifles, artillery, trench systems, steam battleships, telegraph and railways; yet the British soldiers wore their old highly coloured uniforms and took part in their last cavalry charge in Europe. There were over 650,000 casualties. Britain was unable fully to deploy her greatest strength, her Navy, while her Army was led by incompetent aristocrats. The views of ordinary soldiers about Raglan, Cardigan and Lucan make painful reading.

The Crimean War, the most destructive and deadly war of the nineteenth century, has been the subject of countless books, yet historian Anthony Dawson has amassed an astonishing collection of previously unknown and unpublished material, including numerous letters and private journals. Many untapped French
sources reveal aspects of the fighting in the Crimea that have never been portrayed before. The accounts demonstrate the suffering of the troops during the savage winter and the ravages of cholera and dysentery that resulted in the deaths of more than 16,000 British troops and 75,000 French. Whilst there is graphic firsthand testimony from those that fought up the slopes of the Alma, in the valley of death at Balaklava, and the fog of Inkerman, the book focuses upon the siege; the great artillery bombardments, the storming of the Redan and the Mamelon, and the largest man-made hole in history up to that time when the Russians blew up the defences they could not hold, with their own men inside. The Siege of Sevastopol also highlights, for the first time, the fourth major engagement in the Crimea, the Battle of the Tchernaya in August 1855, the Russians last great attempt to break the siege. This predominantly French-fought battle has never before examined in such in English language books.

Florence Nightingale is famous as the “lady with the lamp” in the Crimean War, 1854—56. There is a massive amount of literature on this work, but, as editor Lynn McDonald shows, it is often erroneous, and films and press reporting on it have been even less accurate. The Crimean War reports on Nightingale’s correspondence from the war hospitals and on the staggering amount of work she did post-war to ensure that the appalling death rate from disease (higher
than that from bullets) did not recur. This volume contains much on Nightingale’s
efforts to achieve real reforms. Her well-known, and relatively “sanitized”,
evidence to the royal commission on the war is compared with her confidential,
much franker, and very thorough Notes on the Health of the British Army, where
the full horrors of disease and neglect are laid out, with the names of those
responsible.

In contrast to every other book about the conflict Andrew Lambert's ground-
breaking study The Crimean War: British Grand Strategy against Russia,
1853-1856 is neither an operational history of the armies in the Crimea, nor a
study of the diplomacy of the conflict. The core concern is with grand strategy,
the development and implementation of national policy and strategy. The key
concepts are strategic, derived from the works of Carl von Clausewitz and Sir
Julian Corbett, and the main focus is on naval, not military operations. This
original approach rejected the 'Continentalist' orthodoxy that dominated
contemporary writing about the history of war, reflecting an era when British
security policy was dominated by Inner German Frontier, the British Army of the
Rhine and Air Force Germany. Originally published in 1990 the book appeared
just as the Cold War ended; the strategic landscape for Britain began shifting
away from the continent, and new commitments were emerging that heralded a
return to maritime strategy, as adumbrated in the defence policy papers of the 1990s. With a new introduction that contextualises the 1990 text and situates it in the developing historiography of the Crimean War the new edition makes this essential book available to a new generation of scholars.

This volume provides the most up-to-date analysis of the ethnic cleansing of the Crimean Tatars, their exile in Central Asia and their struggle to return to the Crimean homeland. It also traces the formation of this diaspora nation from Mongol times to the collapse of the Soviet Union. A theme which emerges through the work is the gradual construction of the Crimea as a national homeland by its indigenous Tatar population. It ends with a discussion of the post-Soviet repatriation of the Crimean Tatars to their Russified homeland and the social, emotional and identity problems involved.

In September 1854, the armies of Britain, France and Turkey invaded Russia in what was to become the Crimean War. In the months that followed over half a million soldiers fell. They died from bullet wounds and shrapnel, cholera and disease, starvation and freezing in a medieval conflict fought in a modern age. But what is rarely appreciated is that this extraordinary struggle was fought not only in the Crimea, but also along the Danube, but in the Arctic Ocean, in the Baltic and Pacific. Few wars in history reveal more confusion of purpose or have
had greater unintended consequences. Alexis Troubezkoy's new history traces the causes of this most senseless of wars and sketches a vivid picture of the age which made it possible, interweaving descriptions of the Russian, Turkish and British armies with the principals of the drama — Napoleon III, Marshal St. Arnaud, Lord Raglan, the great Russian engineer Todleban, Florence Nightingale, Nicholas I, and his magnificently terrible Russian empire.

The Crimean War (1853-1856) was the first modern war. A vicious struggle between imperial Russia and an alliance of the British, French and Ottoman Empires, it was the first conflict to be reported first-hand in newspapers, painted by official war artists, recorded by telegraph and photographed by camera. In her new short history, Trudi Tate discusses the ways in which this novel representation itself became part of the modern war machine. She tells forgotten stories about the war experience of individual soldiers and civilians, including journalists, nurses, doctors, war tourists and other witnesses. At the same time, the war was a retrograde one, fought with the mentality, and some of the equipment, of Napoleonic times. Tate argues that the Crimean War was both modern and old-fashioned, looking backwards and forwards, and generating optimism and despair among those who lived through it. She explores this paradox while giving full coverage to the bloody battles (Alma, Balaklava,
Inkerman), the siege of Sebastopol, the much-derided strategies of the commanders, conditions in the field and the cultural impact of the anti-Russian alliance.

Treasury of verse by the great Victorian poet includes the famous long narrative poem, Enoch Arden, plus "The Lady of Shalott," "The Charge of the Light Brigade," "Break, break, break," "Flower in the crannied Wall" and more. Also included are excerpts from three longer works: The Princess, "Maud" and "The Brook."

"The Crimean War: 1853-1856 examines the conflict in both its Europe-wide and global contexts, moving beyond the five great European powers to consider the role and importance of smaller states and theatres of war that have otherwise been under-served. To this end, it looks at fighting on the Danube front, the Black Sea, the Baltic Sea, the Caucasian battlefield, as well as the White Sea and the Pacific, with final chapters devoted to the Paris peace congress of 1856, the end of the war and its legacy."--

What does sound, whether preserved or lost, tell us about nineteenth-century wartime? Hearing the Crimean War: Wartime Sound and the Unmaking of Sense pursues this question through the many territories affected by the Crimean War, including Britain, France, Turkey, Russia, Italy, Poland, Latvia, Dagestan, Chechnya, and Crimea. Examining the experience of listeners and the politics of archiving sound, it reveals the close interplay between nineteenth-century geographies of empire and the media.
through which wartime sounds became audible—or failed to do so. The volume explores the dynamics of sound both in violent encounters on the battlefield and in the experience of listeners far-removed from theaters of war, each essay interrogating the Crimean War's sonic archive in order to address a broad set of issues in musicology, ethnomusicology, literary studies, the history of the senses and sound studies.

The Routledge Handbook of the Crimean War is an edited collection of articles on the various aspects of the Crimean War written by distinguished historians from various countries. Part I focuses on diplomatic, military and regional perspectives. Part II includes contributions on social, cultural and international issues around the war. All contributions are based upon findings of the latest research. While not pretending to be an exhaustive encyclopaedia of this first modern war, the present volume captures the most important topics and the least researched areas in the historiography of the war. The book incorporates new approaches in national historiographies to the war and is intended to be the most up-to-date reference book on the subject. Chapters are devoted to each of the belligerent powers and to other peripheral states that were involved in one way or another in the war. The volume also gives more attention to the Ottoman Empire, which is generally neglected in European books on the war. Both the general public and students of history will find the book useful, balanced and up-to-date.

Crimea: The Great Crimean War, 1854-1856 by Trevor Royle The Crimean War is one
of history's most compelling subjects. It encompassed human suffering, woeful leadership and maladministration on a grand scale. It created a heroic myth out of the disastrous Charge of the Light Brigade and, in Florence Nightingale, it produced one of history's great heroes. New weapons were introduced; trench combat became a fact of daily warfare outside Sebastopol; medical innovation saved countless soldiers' lives that would otherwise have been lost. The war paved the way for the greater conflagration which broke out in 1914 and greatly prefigured the current situation in Eastern Europe.

The first in a series of volumes to discuss the history and development of the non-Russian nationalities in the Soviet Union. --"Professor Fisher's excellent book is brief but clear and succinct. It should be required reading for all students of Russian and European History."--Slavic Review

Please note that the maps available in the print edition do not appear in the ebook.

From "the great storyteller of modern Russian historians," (Financial Times) the definitive account of the forgotten war that shaped the modern age The Charge of the Light Brigade, Florence Nightingale—these are the enduring icons of the Crimean War. Less well-known is that this savage war (1853-1856) killed almost a million soldiers and countless civilians; that it enmeshed four great empires—the British, French, Turkish, and Russian—in a battle over religion as well as territory; that it fixed the fault lines between Russia and the West; that it set in motion the conflicts that would dominate the
century to come. In this masterly history, Orlando Figes reconstructs the first full conflagration of modernity, a global industrialized struggle fought with unusual ferocity and incompetence. Drawing on untapped Russian and Ottoman as well as European sources, Figes vividly depicts the world at war, from the palaces of St. Petersburg to the holy sites of Jerusalem; from the young Tolstoy reporting in Sevastopol to Tsar Nicolas, haunted by dreams of religious salvation; from the ordinary soldiers and nurses on the battlefields to the women and children in towns under siege.. Original, magisterial, alive with voices of the time, The Crimean War is a historical tour de force whose depiction of ethnic cleansing and the West's relations with the Muslim world resonates with contemporary overtones. At once a rigorous, original study and a sweeping, panoramic narrative, The Crimean War is the definitive account of the war that mapped the terrain for today's world..

This book analyzes the Crimean War from the Ottoman perspective based mainly on Ottoman and Russian primary sources, and includes an assessment of the War's impact on the Ottoman state and Ottoman society.

Russia's annexation of Crimea in 2014 brought East - West relations to a low. But, by selling the annexation in starkly nationalist terms to grassroots nationalists, Putin's popularity reached record heights. This volume examines the interactions and tensions between state and societal nationalisms before and after the annexation.

Chloroform, telegraphy, steamships and rifles were distinctly modern features of the
Crimean War. Covered by a large corps of reporters, illustrators and cameramen, it also became the first media war in history. For the benefit of the ubiquitous artists and correspondents, both the domestic events were carefully staged, giving the Crimean War an aesthetically alluring, even spectacular character. With their exclusive focus on written sources, historians have consistently overlooked this visual dimension of the Crimean War. Photo-historian Ulrich Keller challenges the traditional literary bias by drawing on a wealth of pictorial materials from scientific diagrams to photographs, press illustration and academic painting. The result is a new and different historical account which emphasizes the careful aesthetic scripting of the war for popular mass consumption at home.
